- Branding & digital marketing
- Custom software

WHY TECIDO

Built around your process

We start with how you actually work, then configure or build to match.

Local team, direct support

A Doha-based team that visits, trains and supports your staff.

From counter to boardroom

Daily transactions connected to the reports management needs.

A smoother day at the counter.

Practical point-of-sale solutions for sales, service and day-to-day control — configured for restaurants, cafés, salons, supermarkets, pharmacies, laundries, garages and retail outlets.

Sales & billing

Orders, invoices, receipts, discounts and multiple payment methods.

Daily control

Cashier shifts, refunds, cash movements and sales summaries.

Stock & visibility

Item management, inventory tracking and branch reporting.

Industry workflows

Kitchen orders, staff commissions and service-job tracking per trade.

One system for every counter — restaurant, salon, supermarket or garage.

Connect your entire operation.

Bring commercial, operational and financial information together to improve control and reduce repeated work.

Sales & purchasing

Quotations, orders, invoices, purchase orders and goods receiving.

Inventory & production

Stock movements, warehouses, transfers, recipes and production planning.

Finance & accounting

Receivables, payables, receipts, payments and financial reporting.

Multi-entity visibility

Compare branches and business units through management dashboards.

Better visibility from the transaction to the management report.

Manage people and customers with clarity.

Organize employee information and keep every customer relationship in view — attendance, leave and payroll on one side; leads, follow-ups and history on the other.

HRM & PAYROLL

People, **organized.**

 **Employee administration**
Profiles, documents, contracts and employment history.

 **Attendance & leave**
Schedules, attendance records, leave requests and approvals.

 **Payroll preparation**
Salary components, overtime, deductions and payroll reports.

CRM & SALES

Enquiries into **relationships.**

 **Lead management**
Capture enquiries, assign ownership and track progress.

 **Pipeline visibility**
Organize opportunities by stage, value and close date.

 **Customer history**
Contacts, notes and previous interactions together.

A stronger digital presence.

Present your brand clearly, make it easy for customers to find and buy from you online, and reach them on the channels they already use.

WEB, E-COMMERCE & APPS

Business websites

Your company, services and contacts, clear on every device.

E-commerce systems

Online store with products, payments and order handling.

Mobile apps & portals

Customer apps, staff self-service and dashboards on the go.

BRANDING & MARKETING

Brand identity

Logo, colours, stationery and brand guidelines.

Social media & content

Profiles, posts, creatives and content calendars.

Campaigns & advertising

Search and social ads with clear targeting and reporting.

One team for your website, your store, your app and your brand.

Built for the way you work.

When standard systems do not fit, we shape software around your processes — and connect it to the tools you already use.

Custom applications

Workflow design, approvals, role-based controls and operational tools.

AI & automation

Business questions on your data, smart alerts and automated follow-ups.

Integrations

Payments, messaging, delivery platforms and data exchange between systems.

Industry solutions

School canteens, trading, production and service businesses.

01

Discover

Review workflows, users and priorities.

02

Define

Agree features, responsibilities and scope.

03

Implement

Configure, test, prepare data, train users.

04

Support

Assist adoption and plan improvements.

Let's discuss your business.

Start with the business need, agree the scope and let our team guide you from plan to daily operation.
